AIOps Performance and Automation	SYSVIEW, NetMaster, OPS/MVS, Mainframe Topology, Alert Central, Mainframe Observability, Mainframe Operational Intelligence	AIA01	AIOps and Automation Keynote: What's Hot? What's New? What's in it for You?	Join Stuart McIrvine, Director of Product Management, and Nicole Fagen, Director AIOps & Automation, as they share the top industry trends and recent deliverables that you can capitalize on to move your business forward. This session is designed to help you immediately bring greater value to your company when you return to your "office."	Keynote
AIOps Performance and Automation	SYSVIEW	AIA02	SYSVIEW Early Access: Monitoring Complex Performance Conditions	Have you ever wanted to be alerted to a specific problem, but a single SYSVIEW metric just didn't fit your needs? Have you ever resorted to writing complicated REXX rules to evaluate special conditions on your system? Do you wish we could do this for you? If so, then this session is for you. This session will preview a soon-to-come solution from SYSVIEW that will enable you to generate complex monitoring definitions and evaluate SYSVIEW's rich data, in a simple and easy-to-use interface. We will preview combining data from multiple sources in SYSVIEW into a single rule to be evaluated and alert you of these problems. Join us for a preview of this new and exciting technology!	Technical Education/Demo
AIOps Performance and Automation	SYSVIEW	AIA03	SYSVIEW: Install, Configure, Maintain, and Verify Made Easy With z/OSMF	Are you still not using z/OSMF to install your vendor software? How do you know if your new install is up to date and not missing critical maintenance without running tedious reports? Join us in this session to answer those questions using z/OSMF to install, configure, and deploy SYSVIEW quickly and easily with z/OSMF. Plus get a look at a new z/OSMF plug-in included with Broadcom Mainframe Essentials PTF Analysis that allows you to easily verify the health of your install prior to rolling it out.	Technical Education/Demo
AIOps Performance and Automation	SYSVIEW	AIA04	OpenTelemetry Strategy at Broadcom	Have you heard about OpenTelemetry, an open standard for sharing of telemetry data? In this session, you'll hear what OpenTelemetry means to us and what we're doing to participate in this quickly growing space. We will talk specifically about Transaction Tracing and a proof of concept conducted by the SYSVIEW team to decorate transaction trace headers with W3C Trace Context Annotation.	Technical Education/Demo

AIOps Performance and Automation	NetMaster	AIA05	NetMaster: Using SmartTrace to Diagnose Real World Network Issues	During this session, we will explore how you can use NetMaster's SmartTrace feature to diagnose common networking problems. You can use SmartTrace to gather data related to security or performance problems as well as to diagnose failed connections. We will show several methods to create these traces and fetch results, including NetMaster's 3270 interface, the new Web Portal, and ad-hoc scripting using NetMaster's REST API service.	Technical Education/Demo
AIOps Performance and Automation	NetMaster	AIA06	NetMaster: Benefits of Enabling zERT	Attend this session to learn how NetMaster NM for TCP/IP efficiently leverages zERT data to help verify an application's regulatory compliance and the need for stronger security. Using zERT data may indicate if traffic from an application is cryptographically protected by focusing on key security attributes such as cryptographic protocols, algorithms, and keys.	Technical Education/Demo
AIOps Performance and Automation	OPS/MVS	AIA07	OPS/MVS: Basics	Automation is at the core of every well-managed and mismanaged Mainframe environment. The health of your systems relies on a well-configured, implemented, and tuned automation solution. Join our session to learn what OPS/MVS is, what it can do for you, and a getting-started set of OPSMVS best practices. This session is intended for users and system programmers who are new to OPSMVS.	Technical Education/Demo
AIOps Performance and Automation	OPS/MVS	AIA08	OPS/MVS: MRI SSR Reporting and Best Practices	Are you wondering how well your automation solution is implemented across your environments? Is your "golden system" the only system that is golden, and is it leveraging today's best practices? Join this session to learn what the MRI OPS/MVS Software Solution Report can tell you about your OPS/MVS implementations.	Technical Education/Demo
AIOps Performance and Automation	OPS/MVS	AIA09	OPS/MVS: Critical System Message Automation	Don't miss what your system is trying to tell you. Join us to explore a new feature in OPS/MVS that provides default automation options for system critical messages that have no actions being taken.	Technical Education/Demo

AIOps Performance and Automation	OPS/MVS	AIA10	OPS/MVS: Defining the Future of Mainframe Automation	This session offers you an opportunity to share your experiences, voice your opinions, and help shape the future of Mainframe automation. Our goal is to gather valuable customer insights to guide the development of next-generation features and capabilities of OPS/MVS. By attending, you will play a key role in shaping the future of Mainframe automation and leave with a clearer understanding of the direction of the OPS/MVS product.	Technical Education/Demo
AIOps Performance and Automation	OPS/MVS	AIA11	Leveraging Mainframe Automation Insights from OPS/MVS Log Data	Explore the insights you can gain from analyzing Mainframe automation OPS/MVS log data. Learn about common problems and use cases identified through log analysis, and how to evaluate if you suffer from the same issues. Participate in a discussion on how to analyze log data to get the most out of your Mainframe automation operations. Gain knowledge and tips to improve your approach to log analysis, and share your preferred methods with others. Join this interactive session to enhance your understanding of Mainframe automation and optimize your operations.	Technical Education/Demo
AIOps Performance and Automation	OPS/MVS	AIA12	OPS/MVS: System State Manager (SSM) Deep Dive	Expand your knowledge of the system state manager within OPS/MVS. This session is recommended for system programmers interested in discovering new concepts and best practices.	Technical Education/Demo
AIOps Performance and Automation	OPS/MVS	AIA13	OPS/MVS: Modern Management of Rules and REXX Programs	Struggling to use legacy tools to manage OPS/MVS rules and REXX? Would you like to use modern development tools to edit, distribute, and manage the status of you automation code? Join us to talk through strategies of how modern DevOps principles and concepts can apply to creating and managing OPS/REXX automation and rules.	Technical Education/Demo
AIOps Performance and Automation	Mainframe Topology	AIA14	Mainframe Topology: Discovering Your Environment – From Change Management to Business Applications	Are you tired of relying on outdated and static diagrams to understand your Mainframe environment? Are you looking for a more efficient way to manage changes and minimize disruptions? Our automatically generated Mainframe Topology creates a dynamic and real-time representation of your entire IT environment. During this session, we'll show you how to streamline the process of updating your change management system – and also how to create a visual representation of your business applications.	Technical Education/Demo

AIOps Performance and Automation	Alert Central	AIA15	Alert Central: Basics	Join us to see how Alert Central can go beyond centralizing alerts using insights to accelerate troubleshooting and problem resolution. We will show you how Alert Central gets insights around alerts leveraging APIs, such as SYSVIEW APIs (to gather CICS, Db2 and MQ Metrics, show QuickRef information, and enable a Command Interface), OPS/MVS APIs (to bring extracts of OPSLOG around the alert time), and Topology APIs (to show how alerted resources are connected to other parts of the infrastructure).	Technical Education/Demo
AIOps Performance and Automation	SYSVIEW, Mainframe Operational Intelligence, Alert Central, Mainframe Topology	AIA16	Observability: Prioritize and Investigate Infrastructure Issues Based on Business Impact	Discover the power behind SYSVIEW, MOI, Alert Central and Topology integrations which leverage their existing APIs to give you the ability to easily identify problems within business applications and infrastructure components, using a seamless user experience. All based on key performance indicators (KPIs) in areas such as CICS, Db2 and MQ.	Technical Education/Demo
AIOps Performance and Automation	SYSVIEW, Mainframe Operational Intelligence	AIA17	SYSVIEW and MOI Hands-On: Set Meaningful Rules for Real-Time Proactive Monitoring and Alerting	Take the complexity out of monitoring your system and learn how to effectively set rules with SYSVIEW. This session will cover what metrics SYSVIEW has to offer, and how to set rules and configure actions/notifications when they trigger. Plus, we'll cover how to use MOI's Green Highways to better understand key metrics, as well as the latest version of SYSVIEW 17.0 and its upgraded monitoring to simplify the process of setting rules and managing them.	Technical Education/Demo
Core Infrastructure, Open Mainframe and Workload Automation	Brightside (Zowe CLI, Zowe API-ML, Zowe Explorer, Che4z, Code4z)	CWA01	Zero Trust Architecture	Implementing Zero Trust Architecture (ZTA) is an essential step for any organization that wants to ensure the security of its digital assets. ZTA is a security strategy that focuses on verifying user identity and access rights right before granting access to resources. Join this session to learn more about the strategy, where you can start with the implementation, what role Zowe plays, and its different components in that strategy. Zowe provides the API Mediation Layer as the core component for accessing all the Mainframe infrastructure services that provide security functionalities, and observability, and should be part of your strategy. Core Infrastructure, Open Mainframe and Workload Automation	Workload Automation CA 7 Edition, Workload Automation ESP Edition	CWA07	Aligning Workload Automation Capabilities with Your Needs Roundtable	Help us prioritize the backlog of capabilities for CA 7 and ESP. By understanding your needs and goals, we can ensure that the development efforts for these solutions align with the most critical areas. This session will enable you to provide valuable input on what features and capabilities are most important to you. Join us to have a say in the future developments of these solutions and leave with a clear understanding of how they can help your organization.	Roundtable/Ideas and Design Thinking
Core Infrastructure, Open Mainframe and Workload Automation	Workload Automation CA 7 Edition, Workload Automation ESP Edition	CWA08	Automating Web Service (Cloud) Applications	During this session, we'll show you how to automate Web service and cloud-based applications using existing CA 7 and ESP capabilities to meet your modern workload needs. We'll explore the capabilities of these solutions and how they can be used to schedule and manage cloud-based workloads.	Technical Education/Demo
Data Management	Database Management Solutions for IMS, Datacom, Db2 Administration, Db2 Backup/Recovery, Db2 Performance, Db2 Utilities, IDMS, Vantage, View/Deliver/Web Viewer/Spool	DMT01	Data Management Keynote: Data Management, Leveraging the Strength of Our Community	In an increasingly interconnected world, the Mainframe must be both secure and open, and these are naturally opposing forces. With data as a vital asset and at the center of your IT infrastructure of which the Mainframe is the heartbeat powering transactions that drive your business. Our mission at Broadcom is to partner closely with our customers to understand critical business challenges. Broadcom and DAF Trucks leadership will share the story of transformation that comes out of a community based partnership. Hear how we joined our teams together on a strategic journey and objective to transform, secure and modernize the Mainframe while opening access to data and services that will integrate into the larger enterprise IT ecosystem.	Keynote
Data Management	Db2 Backup/Recovery, Db2 Utilities	DMT02	Back to Basics: Db2 Logging 101 and Exploitation Beyond Recovery Using Log Analyzer Recovery	This session will provide a quick overview of the Db2 LOG's ecosystem and dive into important aspects like what's in the log, the impact of Data Capture Changes as well as the importance of understanding the impact when Triggers and RI is involved. We will also share some real life war stories about how customers are solving problems using Log Analyzer and cover some of the newer enhancements.	Technical Education/Demo

Data Management	Db2 Administration, Db2 Backup/Recovery, Db2 Performance, Db2 Utilities	DMT03	Db2 Tools Post-install: What's New, The Future, Tips & Tricks, and Best Practices	Database Management for Db2 for z/OS post-install process is not always in the headlines. However, it is a very important and integral part of our solution portfolio not just for new installations, but also for configuration changes and updates. In this session, we will show recent enhancements that might be of interest to many users, best practices for installation and configuration, and what is in the roadmap in this space. Join us to learn what's new in Db2 tools post-install, tips and tricks, XManager configuration updates for Level Sets, new navigation commands, improvements for data sharing groups, installation and configuration best practices and current works in progress such as z/OSMF workflows, PTDB UTS Conversion, PTDB Object Cleanup.	General Education
Data Management	Db2 Utilities	DMT04	Tips and Tricks for Fast Load and Fast Unload for Db2 for z/OS	The Fast Load (PFL) and Fast Unload (PFU) have several features which might improve your performance when (un)loading tables from the database. In this session, the features will be described, as well as, shown their impact on the resources used by the utilities. Special care will be given to a newly introduced SQL keyword 'EXCLUDE'.	Technical Education/Demo
Data Management	Db2 Administration, Db2 Backup/Recovery, Db2 Performance, Db2 Utilities	DMT05	What's New for Db2 Tools: A Recap of the Last Year	Join us for a look at the functionality added to the Database Management Solutions for Db2 for z/OS with Level Sets 20.0.04 thru 20.0.07. This presentation will highlight the features that require Level Set Activation.	Technical Education/Demo
Data Management	Db2 Backup/Recovery	DMT06	Db2 Recovery and Compliance: Present and Future	Do you know how to assess recoverability of your Db2 objects? Can you prove you have resources to perform a successful recovery? And, will the recovery complete within a given SLA timeframe? These are the tough questions for a DBA! Join this session to get all necessary answers. We will walk you through the existing Db2 recovery and recovery compliance processes, provide the latest updates and share our plans to make it simpler, faster, and less manual. We would love to get your feedback!	Technical Education/Demo

Data Management	Db2 Administration, Db2 Performance, Db2 Utilities	DMT07	Transform your Experience with Mainframe Databases	In many of our conversations with customers, a common thread emerged around the need to improve how they can interact with Mainframe databases without deep seated domain knowledge. Our customers recognize the qualities of service from Mainframe databases, but they find the experience managing these databases to be cumbersome and entirely foreign if they did not grow up with the technology. Our answer to the challenge for new Mainframe users is to build services or APIs around Mainframe databases, which includes Broadcom's IDMS and Datacom, that make them accessible. In this session, we will pull back the curtains to show you the design and development work we done to surface the APIs from Mainframe databases through a modern graphical interface. As this is a journey, we will start with Db2 for z/OS by surfacing the capabilities of Broadcom's wide range of capabilities in our Db2 database management tools portfolio, and replicate to the other database engines in the future. We would also love to hear your feedback on how this would play out in your day to day activities. We firmly believe in co-creating with our customers, so the end result is something that can deliver immediate value. Join us on this exciting adventure and make your voice heard! Products covered include: Administration Suite for Db2 for z/OS and Performance Suite for Db2 for z/OS	Technical Education/Demo
Data Management	Db2 Administration, Db2 Backup/Recovery, Db2 Performance, Db2 Utilities	DMT08	Data Management Roundtable	Do you have questions or ideas around how we are helping you get more out of Db2 for z/OS that you would like to discuss with Broadcom experts and other customers? Join us for a roundtable led by our Broadcom product team leaders for Db2 Tools. We will discuss topics that are top of mind for you and share best practices.	Roundtable/Ideas and Design Thinking
Data Management	View/Deliver/Web Viewer/Spool	DMT09	Successfully Deploying Web Viewer 14: Mastering Installation and Configuration	Deploying new software can be a complex and challenging process, but with the right approach, it can be a smooth and successful experience. In this session, we will explore how to successfully implement Web Viewer r14, including best practices for installation and configuration. You will learn how to effectively plan, prepare, and execute the deployment, and how to avoid common pitfalls along the way.	Technical Education/Demo
Data Management	Vantage	DMT10	Understanding Storage Data with Vantage	Storage managers are constantly racing to optimize available space ensuring business continuity and keeping the costs down. In this session, learn how customers are taking a simplified storage management approach with Vantage to keep their staff informed and the overall cost low using CA 1 Flexible Storage. Join this session to learn how to set up a report, a dashboard and take corrective actions.	Roundtable/Ideas and Design Thinking

Data Management	Db2 Administration, Db2 Backup/Recovery, Db2 Performance, Db2 Utilities	DMT18	User Experience: Usability Testing for Mainframe Database GUI	Managing databases requires DBAs to perform a wide range of tasks, and we're working on a new database product designed to improve several use cases, including monitoring applications, provisioning schemas, synchronizing schemas, and browsing the database catalog. It leverages decades of ISPF tool development to streamline routine tasks and offers new ways to access these tools. In this user study, we are looking for DBAs to drive a clickable prototype by completing a set of predefined tasks and provide feedback on the prototype's usability. By involving end users like you early in the process, we can gather valuable insights to refine the product and ensure that it resonates with how you perform your job today.	Hands on Lab
Data Management	View/Deliver/Web Viewer/Spool	DMT19	User Experience: Annotations and Bookmarks in Web Viewer 14 Hands-On Experience	Join us for a session where we'll present the Annotations and Bookmarks features in Web Viewer. We'll conduct user testing to understand how these features will impact the user experience in the future and identify areas for improvement. Our insights will help enhance the functionality and ease of use of these features, improving the overall user experience.	Hands on Lab
Data Management	Db2 Administration, Endevor, Mainframe Topology	DMT20	User Experience: Bridge the Divide Between Infrastructure and Databases	It's an age-old problem: Is it the software or the infrastructure? A user calls for help – the application is slow, but what's causing it? As a system administrator, you need to determine whether it's the virtual machine, the code, or maybe the database. It could be one or more, but how do you know which one? Your first inclination might be to call the DBA and get them to rule out the database as the source while you investigate. But what if you could immediately pinpoint the root cause anywhere in the stack and work collaboratively with your DBA to resolve it? Currently, DBAs and system administrators are on different ends of the same problem, and neither has visibility into the other's domain. There's a divide between infrastructure and databases that neither side can currently bridge. Join us and explore a bird's eye view of your infrastructure with DBs and their connection to other resources in a graph.	Technical Education/Demo

DevOps and Security	Brightside (Zowe CLI, Zowe API-ML, Zowe Explorer, Che4z, Code4z), Endevor, GEN, Hostbridge	DOS01	DevOps Keynote: Mainframe Application and Development Modernization	Modernization efforts include tools, processes, and applications used to drive business. Different vendors approach this topic in different ways. At Broadcom, we are committed to in-place modernization of COBOL applications, processes and tools in a way that ensures a great deal of flexibility with the pace of change within the project, or across the portfolio of applications. This session will articulate the Broadcom approach to modernization and introduce some of the recent updates to our portfolio.	Keynote
DevOps and Security	Brightside (Zowe CLI, Zowe API-ML, Zowe Explorer, Che4z, Code4z), Endevor	DOS02	Introduction to Mainframe DevOps Suite	Join us for an overview of Mainframe DevOps Suite, its components, and latest improvements to the applications in the Suite. We will introduce the most popular use cases and explain how to get more value from the available portfolio of Broadcom products packaged as a DevOps Suite.	General Education
DevOps and Security	Endevor	DOS03	Endevor Web Service Business Value	Endevor Web Service is the key component of the product. It is the cornerstone of the modern developer and administration experience. In this session, you will learn how Endevor Web Service can be used to help standardize DevOps efforts on the Mainframe and ensure consistency with distributed and cloud development.	Technical Education/Demo
DevOps and Security	Endevor	DOS04	How to Map Endevor to Git with Bridge for Git	Join us for an introduction to Bridge for Git and a guide for mapping of code managed in Endevor with GitHub servers. In this session, we will use GitHub Enterprise as an example.	Technical Education/Demo
DevOps and Security	Datacom, Db2 Administration, Db2 Performance, IDMS	DOS05	Explore DevOps for Mainframe Databases	Join this session to learn about the capabilities in the DevOps realm for Mainframe databases such as Db2 for z/OS, Datacom and IDMS. We will share the current and planned developments. You will learn what Broadcom's Open-Mainframe approach for databases looks like. Your feedback would be greatly appreciated.	Technical Education/Demo
DevOps and Security	Hostbridge	DOS06	Extending IBM z/OS Connect with HostBridge	HostBridge is the latest addition to the Broadcom portfolio of app development modernization solutions. It uses JavaScript inside the CICS address space for fast and reliable integration of API calls. HostBridge API integration capabilities extend the capabilities of the solutions like z/OS Connect, allowing you to optimize interactions with an external system, reduce MIPS overhead and improve performance of hybrid applications. DevOps and Security	Advanced Authentication Mainframe, Trusted Access Manager for z, Cleanup	DOS13	Securing Mainframe DevOps Beyond Development	Developing secure code is critical in preventing breaches on your Mainframe. However, exposures are often found in the DevOps lifecycle beyond development itself, such as unpatched vulnerabilities in already deployed code, system misconfigurations, and overly broad developer access. Join us in this session to discuss best practices and techniques to mitigate these and other possible security gaps in the DevOps lifecycle beyond development.	Technical education/demo
DevOps and Security	Brightside (Zowe CLI, Zowe API-ML, Zowe Explorer, Che4z, Code4z)	DOS14	Advantages of using Visual Studio Code with Endevor	Tired of paging through thousands of code lines on your green screen day after day? Come to our interactive session to learn how you can leverage the power of VS Code and Broadcom extensions to easily access and analyze your Endevor source code and make changes to your COBOL code from the comfort of an intelligent editor. Learn about the features of Code4z, which bring the experience of developing Mainframe apps to the next level.	Technical Education/Demo
DevOps and Security	Gen	DOS15	GEN Web Service APIs	Join this session for an overview of capabilities for publishing REST APIs for Java and CICS applications developed in Gen.	Technical Education/Demo
DevOps and Security	Endevor	DOS16	User Experience: Desktop and Mobile Endevor Approvals Pre-Production Testing	Do you work with Endevor? Do you want to know what the Approvals Portal is for? Do you want hands-on experience? Join us to try our early version of Endevor Approvals on mobile and desktop. You will get a chance to test-drive what it is like to approve packages using your smartphone – and give us your feedback on the tool.	Roundtable/Ideas and Design Thinking

He'll share how the Mainframe - and its ecosystem - is making digital life a reality, how the Mainframe is critical in delivering on the innovations that are the fabric of modern society, and how digital transformation is an extension of all of us in the Mainframe community. You'll go behind the scenes with customers who are speeding up the delivery of software or integrating their front-end sales systems with the Mainframe and learn how, at the same time, we are partnering with them to remove silos to share knowledge, inspire others, and foster collaboration.	Keynote

General	Mainframe Essentials	GEN02	Mainframe Essentials: Software Risk Assessment - BYOD	Software Risk Assessment is an exciting new feature included in Mainframe Essentials that allows users to easily assess risk relating to available product maintenance on their systems. This Bring Your Own Device (BYOD) session will give users hands-on experience with configuring and using Software Risk Assessment. After this session, users will be able to use SYSVIEW to list PTFs that have not been downloaded or received, view detailed PTF descriptions, determine products that are out of support, and much more.	Hands on Lab

Chorus Software Manager is going away in June, and all customers are being asked to transition to z/OSMF for software management. Join this session to learn about tools and resources that can help you migrate and use z/OSMF more efficiently. We will also introduce the new Software Toolkit z/OSMF plugin that enables you to use the PTF analysis features known from Mainframe Essentials and SYSVIEW directly from z/OSMF.	General Education

Additionally, governments around the world are working on standards and regulations to strengthen the software supply chains. US Executive Order 14028 on Improving the Nation's Cybersecurity and the draft EU Cyber Resiliency Act are on the way to significantly impact how software is developed and delivered to customers. Join us to learn about best practices and resources available to you to manage software vulnerabilities, upcoming regulations regarding software supply chains, and what you can expect from Broadcom Mainframe Software to continue to strengthen the security of the software we provide to our customers.	General Education
