BROADCOM SECURITY WORKSHOP: ESM CONFIGURATION

1 MAINFRAME ESM CONFIGURATION

Understanding the impact of the external security manager configuration, misconfiguration, and resource access privileges is crucial to securing and protecting the mainframe from internal and external cyber threats.

Evaluating the current mainframe security configuration helps to analyze and understand the security gaps and the current mainframe security posture.

The MRI Security Essentials assessment offers analyses of External Security Manager (ESM) configurations and settings to compare with industry best practices.

2 JOIN OUR COMPLIMENTARY WORKSHOP

This workshop will provide awareness and preparation to improve your regulatory compliance and security posture on the mainframe. The complimentary Compliance and ESM Configuration workshop includes a free external security manager assessment and an expert review and to help identify security configuration gaps in your environment.

3 WHAT YOU WILL LEARN

• Scan configurations and settings to identify high-risk vulnerabilities and cyber threats that affect mainframe compliance
• Explore mainframe security and compliance best practices, industry security standards, and recommended configurations
• Find and deploy crucial security and integrity fixes

4 WHAT TO EXPECT

• Live Demo / walk through of MRI SE Process
• Review the finding and collaborate with Security Experts
• Build confidence and a path forward and improve security posture

What you will learn:

- Scan configurations and settings to identify high-risk vulnerabilities and cyber threats that affect mainframe compliance
- Explore mainframe security and compliance best practices, industry security standards, and recommended configurations
- Find and deploy crucial security and integrity fixes
BROADCOM SECURITY WORKSHOP: ESM CONFIGURATION

WORKSHOP DURATION: 90 MINUTES

Who should attend:
- Mainframe Security Administrator and Team
- Sysprogs and system team
- Mainframe Management team
- Internal Audit/Compliance team

Workshop prework:
- Download and run MRI SE Toolkit for your ESM
- Upload the output to mri.broadcom.com

OTHER COMPLIMENTARY PRODUCT WORKSHOPS

Access Control
- This workshop will provide preparation to improve your access control on the mainframe:
  - How to discover the risks associated with system critical libraries and application datasets access and remediation
  - Discover and identify high-risk vulnerabilities due to excessive access privileges that do not align with security best practices
  - Understand the report that conveys risk and actionable recommendations

Continuous Monitoring
This workshop provides a detailed execution plan to monitor and alert your staff and Security Operations Center to critical mainframe security risks using continuous monitoring:
- Understand continuous monitoring and how to perform it on the mainframe
- Learn how the Compliance Event Manager tool can be used for continuous monitoring
- Review and explore implementation of Mainframe best practices for continuous monitoring

Managing Mainframe Privileged Users
This workshop provides a detailed execution plan to establish comprehensive, just-in-time privileged access for all privileged users on the mainframe:
- Key concerns and regulatory requirements regarding privileged users
- How to quickly identify privileged users on your mainframe
- Quick actions to dramatically reduce the risk of privileged users on your mainframe

About Broadcom Mainframe Software
Broadcom Mainframe Software Division specializes in Security, DevOps, AIOps, Data Management, and Core Infrastructure software solutions for vital infrastructure. We enable our clients to adopt common tools using industry standards, integrate Mainframe as part of their hybrid cloud, and partner to drive greater value and overall success with the platform.
